

## as4 modular furniture system

First, let me say that we have received all the packages, and were speechless after opening the first one. Each piece is absolutely gorgeous, and the quality and craftsmanship is remarkable. We are reluctant to put anything on the shelves, quite frankly. They are works of art...We are SO PLEASED with your product.

-K. Norris

Just thought you'd like to know that a twelve year old girl can completely fill your shelves with books, notebooks, stuffed animals, jewelry, pottery projects, papier mache projects, miscellaneous goodies from birthday parties, pictures, old dolls, toys, and a combination of objects that defy description except to say that they ABSOLUTELY CANNOT be thrown out - and the shelves still look stunning. We are all very happy with them.

-D. Berke  
Deborah Berke and Partners Architects

The as4 system arrived in good shape and is already up and full of books. It was very easy to install. Also, it looks even better than we had imagined (and we had high expectations) – we are very happy with the result, this is first rate design and craftsmanship combined!

-M. Sogaard

Just wanted to let you know that the client loves the shelves and they say that everyone who comes in compliments them. I hope that we can use your product again.

-W. Wisbrun RA  
BKSK Architects LLP

Oliver just finished the installation and it is PERFECTION! I could not be happier and more thrilled! ...just wanted to thank you again for transforming my home (and life!), and also thank you again for recommending Oliver for the installation. He could not have done a better job!

as4 modular furniture system

Just wanted to let you know that the installation went well and thanks for sending Matt to help us -- he very patiently worked with us to decide exactly how to place the shelves. They look terrific -- I'm so glad that we found your product before we resorted to built-ins...

-S. Sensiper

I just wanted to let you know how pleased we are with our bookshelves. They look great; feel sturdy and warm up the room. And the guys who did the installation were very nice.

-N. Mizusaki  
supermarket

Just wanted to let you know, we finished installation of the system over the weekend and have it all loaded up. It looks really, really good. So Robin and I thank you for helping us pick this out and for designing such a beautiful system.

-J. Hartmann

I'm here to report that the shelves are installed and that they are astoundingly beautiful and functional. I am so happy with them. Joseph and the rest at Atlas went to the trouble to put a special finish on for me: tung oil. It turned out beautifully. I really love it.
